HEARTHSTONE IRIS INTRODUCTIONS

The year of registration with the American Iris Society, and parentage, when known, are given for each seedling.

CARRARA, 1931—A small pure white, as good as Snow White and Columbine,
2 for 25c.

CUDBEAR, 1931—Royal purple. Color is fine, but too tall, making it sometimes floppy. 2 for 25c.

GERONIMO, 1937—(Messaline vs. Apache). Carries the coppery color of Apache into a taller, larger and more elegant flower, 5.00

HEARTHSTONE COPPER, 1930—Standards light yellow; falls fiery brick red. Very striking and entirely different. 50c.

IVORY ELF, 1938—(Hermoine vs. Betsy Presby) Taller than most intermediates, floriferous, excellent form and size. Tested since 1931, and registered by popular demand. 2.00

One each of the above five introductions, \$6
